

Essential Site Safety Checklist for Welfare Units & Temporary Accommodations

Prioritise safety to keep your site compliant and your workers protected.

Ensure units are placed on stable ground with proper anchoring or leveling.

Confirm safe access and exit routes; keep pathways clear of obstructions.

Check for proper ventilation in confined spaces and ensure fresh air flow.

Inspect electrical systems, sockets, and cords for any damage or exposed wires.

Place fire extinguishers within easy reach and test alarms if applicable.

Stock supplies (soap, sanitisers, and clean water) and ensure waste disposal facilities.

Ensure proper temperature control and check for insulation in extreme conditions.

Confirm adequate lighting inside and around units, especially in low-light conditions.

Display emergency contact information, and locate the nearest first aid kit.

Regularly check for pests and keep the area around units clean.
